Texas Truck A/C named 2019 Family Owned Business of the Year

Texas Truck A/C is proud to have been named the 2019 "Family Owned Business of The Year" by the U.S. Small Business Administration. This award is a testament

not only to the hard work of owners Nick and Marci Rosato, but to the family-like culture and values that bond the entire Texas Truck team. President Marci said, "We're fortunate to have a group of individuals that have come together so well over the years; our team truly is a second family."

For more information on Texas Truck A/C, please visit texastruckac.com.

University of the Aftermarket Foundation launches new website

A new website for the University of the Aftermarket Foundation, a nonprofit organization that has provided millions

of dollars in scholarships and research for the aftermarket work force, launched in November 2019. The new website features a portal for hundreds of automotive scholarships; a simple-to-use donation system; updated lists of trustees, donors, and scholarship recipients; and other useful resources for students and donors.

"If you know someone who is interested in a career in the automotive aftermar-

ket, it is well worth their time, and yours, to visit the attractive new UAF website and apply for one of the many scholarships the foundation has to offer," said Bob Egan, the chairman of UAF.

The foundation's former web address will redirect visitors to the new site. To learn more, make a donation, or apply for a scholarship or grant, visit uofa-foundation.org.

Stop Leaking Profits

We know finding an AC system leak can be difficult and time consuming. You need to find a leak fast or verify that a repaired system is leak-free. INFICON's family of leak detectors help you complete the repair and move on to the next job quickly and confidently.

INFICON field-proven leak detectors provide the superior sensitivity you need to reliably and repeatedly find any leak, so you can fix it right—the first time.
